

EKUANTUM · MODULE FOR ENERGY RETAILERS AND ADVISERS · PRO LEVEL

EVERYTHING IN EK1 ENERGÍA, PLUS WHAT YOU NEED TO WIN, COMPARE AND COLLECT YOUR COMMISSIONS

Upload the invoice and the AI fills in the supply record; the comparator, calculated in the system with your offers and your tolls, prepares a savings proposal as a PDF with your brand and signature. A renewal radar at 90, 60 and 30 days, commissions and reconciliation by CUPS, partners with settlement and a PDF self-invoice, a contracting file with withdrawal period and a client portal.

EKUANTUM

EK

THE REALITY

You type the invoice, you compare in a spreadsheet. And the renewal slips by until the client has already gone

Do you type in each invoice's data by hand to be able to compare?

Does your comparison live in a spreadsheet and every salesperson calculates differently?

Do you find out a contract expires when someone else has already renewed it?

Do your commissions from each retailer not match what they pay you?

Are the contracting file, the withdrawal period and the consents scattered across emails and folders?

INVOICE · COMPARATOR · RADAR · PORTAL

From invoice to commission without extra typing

The AI reads the invoice and fills in the record, you review it, the system compares against your offers and the proposal goes out as a signed PDF. Then the radar watches the renewal and commissions are reconciled.

The system calculates the numbers — The comparator and commissions are calculated by the system with your offers and your rules. The AI only reads the invoice, and you review the record before using it.

EK

WHAT IT DOES FOR YOU

Your energy advisory, in the panel

01 Invoice read by AI
Upload the invoice and the AI fills in the supply record. You review it before using it.

02 Comparator calculated in code
2.0TD, 3.0TD, 6.1TD and gas, with the offers and tolls the adviser loads. The whole team calculates the same way.

03 Savings proposal with signature
A PDF with your brand, ready to sign.

04 Renewal radar
Alerts at 90, 60 and 30 days with the message already prepared.

05 Commissions and reconciliation by CUPS
What each retailer owes you, checked against what they settle.

06 Partners with self-invoice
Each partner's settlement and their self-invoice as a PDF.

07 RD 88/2026 file
The contracting file with its withdrawal period, in one place.

08 Consents with blocking
Consents are stored and the system blocks households that have not made a request.

09 Client portal
Your client sees their proposal and contract in their own portal.

EK

WHAT YOU GET

From invoice to signature to renewal

Not loose sheets: your supplies, your offers and your commissions connected.

🧾 Invoice read

The AI fills in, you review.

⚖️ Comparison calculated

With your offers, by the system.

✍️ Proposal with signature

PDF with your brand, ready to sign.

🔔 Renewal watched

Alerts at 90, 60 and 30 days.

EK

HOW IT WORKS

From invoice to renewal

1. You upload the invoice and review the record the AI fills in.
2. The comparator calculates with your offers.
3. You send the savings proposal for signature.
4. You keep the contracting file with its withdrawal period and the consents.
5. The radar alerts you to the renewal and your commission is reconciled.

Every supply, from invoice to renewal.

EK

THE DIFFERENCE

Not just a comparator. It is your advisory inside your panel

› All in the same panel

Supplies, contacts, calendar, campaigns and invoices in the EK1 panel.

› One calculation

The same comparator for the whole team.

› Paperwork in order

A file with withdrawal period and consents.

› The client in their portal

They see their proposal and contract.

EK

WHAT YOU GET

An advisory that compares, signs and renews

1
comparator calculated by the system

90·60·30
days of renewal alerts

RD 88/2026
file with withdrawal period

1
client portal

EK

WHAT IS INCLUDED

EK1 Energía Pro, everything in Energía and more

- ✓ Everything in EK1 Energía: supplies and renewals.
- ✓ AI-read invoice: fills in the supply record and you review it.
- ✓ A comparator calculated in code for 2.0TD, 3.0TD, 6.1TD and gas, with the offers and tolls the adviser loads.
- ✓ A savings proposal as a PDF with your brand and signature.
- ✓ A renewal radar at 90, 60 and 30 days with the message prepared.
- ✓ Commissions and reconciliation by CUPS.
- ✓ Partners with their settlement and a PDF self-invoice.
- ✓ RD 88/2026 contracting file with withdrawal period.
- ✓ Consents with blocking for households without a request.
- ✓ Client portal.

It does not look up supply data by CUPS (no SIPS) and has no connection to Datadis or PVGIS. It does not include the official tolls table: you load the offers and tolls yourself. The self-invoice is a PDF: it is not registered in the ERP or in VERI*FACTU. The AI only reads the invoice and you review the record. The AI agents are separate. It requires EK1 Suite.

EK

SECTOR MODULE FOR EK1 · PRO LEVEL

€99

PER MONTH · EXCL. VAT · NO SET-UP FEE

It requires **EK1 Suite** (€79/mo). Only for new customers from 1 December 2026. **EK1 Energía** (€49/mo) covers supplies and renewals. **EK1 Energía Pro** (€99/mo) replaces Energía and includes everything in it, and adds an AI-read invoice, comparator, savings proposal, radar, commissions and reconciliation, partners, an RD 88/2026 file, consents and a client portal. No set-up fee.

Prices exclude VAT, no set-up fee. Only for new customers from 1 December 2026: whoever already uses it keeps it at no extra cost (Emporio Kuantum OÜ, Estonia · intra-EU reverse charge with a valid VAT number).

THE NEXT STEP

How many renewals slip away unnoticed?

Start 30 days free with your EK1, or talk to Sam and we will show you your advisory in the panel.
